Roger Posadas

ni Rogelio Sicat
Dekano, Kolehiyo ng Arte at Literatura

Kung paano napunta sa pisika si Roger Posadas, ay nagkataon lamang. Ang talaga niyang balak, matapos mag valedictorian sa Xavier University High School sa Lungsod ng Cagayan de Oro noong 1960, ay mag-aral muna siya ng engineering nang dalawang taon sa U.P. at pagkaraa'y lilipat sa Philippine Military Academy (PMA).

PANGANAY SIYA SA PITONG anak, limang lalaki at dalawang babae, nina Col. Rolando Posadas ng Philippine Army at Carmen de la Rosa, ng Lingayen at Dagupan, Pangasinan. Tuwid ang tindig at hanggang ngayon, sa edad na 49, ay balingkinitan pa ang pangangatawan, ibig din niyang maging opisyal ng hukbong sandatahan. Palipat-lipat siya ng paaralan; kung saan nadeestino ang ama ay doon siya nag-aaral. Nang sinasagot niya ang aplikasyon para sa iskolarship ng NSDB, basta niya isinulat: "Physics."

HINDI SIYA NATULOY SA PMA. Lumabo ang kanyang mga mata sa pag-aaral. Tinapos niya ang B.S. Physics noong 1964. Nagturo siya bilang Instructor nang isang taon, at noong 1965, nabigyan siya ng grant ng Rockefeller Foundation upang mag-aral sa University of Pittsburgh. Magdadalubhasa siya sa pisika.

ANG PINILI NIYANG espesiyalisasyon: General Relativity ni Einstein. Hindi na siya dumaan sa programang masteral. Tinapos niya noong Mayo 1970 ang doktorado — ang disertasyon ay "The Motion and Structure of Singularities in General Relativity" — sa loob lamang ng apat at kalahating taon. Sa panahong kinukuha ang Ph. D., visiting scholar siya at kalahok sa mga komperensiya sa relativity sa University of London at University of Cambridge sa England.

BUMALIK SIYA SA DILIMAN noong Hunyo ng 1970. Naging Assistant Professor siya, at pagkaraan ng isang buwan, siya'y hinirang na Tagapangulo ng Departamento ng Pisika — mabilis na

kakayahang mamuno at mangasiwa. Lumahok siya sa tumitinding aktibismo. Isang organisador, itinatag niya ang *Samahan ng mga Makabayang Siyentipiko*, kauna-unahang kapisanan sa bansa ng mga propesyonal at estudyante ng agham at teknolohiya. Minomobilisa niya ito upang ipaglaban ang isang makabayang programa sa agham at teknolohiya.

KASAMA RIN SIYA SA pagtatag ng aktibistang *Samahan ng mga Guro sa Pamantasan, SAGUPA*. Sa tinawag na Diliman Commune - pag-agaw at pagtatakbo ng mga estudyante sa unibersidad na tinangkang salakayin ng militar at pulisya-umimbento sila ng "self - igniting molotovs".

Noong 1971, markado siyang subersibo. Delikado ang matatakan ng ganito. Ilang guro ang kahit nagkakalase sa Palma Hall ay inaaresto. Sumapi siya sa kilusang lihim.

Nagpakasal sila ni Linda Santiago noong Pebrero 14, 1972. Sa taong ding ito, isinilang ang una sa apat nilang anak na lalaki. Si Linda mismo ay magdodoktorado (Ph.D. Laser Physics), ngunit ito'y nang pumanatag na sila.

NOONG ENERO NG 1976, nadakip siya. Tinortyur siya at ikinulong sa Bicutan at Kampo Crame, sa huli'y kasama ang mga karaniwang kriminal. Pagkaraan ng dalawang taon at siyam na buwan, noong Oktubre ng 1978 ay pinalaya siya, kaipala'y dahil sa petisyon ng mga bantog na siyentipiko sa ibang bansa na nangambang baka siya'y puksain lamang ng batas militar.

BUMALIK SIYANG TAGAPANGULO ng Departamento ng Pisika noong Enero 1980.

Sa isa't kalahating taon - palatandaan ng pagbabagong akademiko na gagawin niya sa Kolehiyo ng Agham - Ginawa niyang limang taon ang B.S. Physics. Para masanay sa pananaliskik, pinasulat niya ng tesis pati ang mga di-gradwado (undergraduate) na mag-aaral. Binago rin niya ang programang masteral sa pisika, at inilunsad ang kauna-unahang doktoradong programa sa pisika ng bansa.

NANG MAPILING CHANSELOR AT tanungin kung ano ang pinakamalaki niyang nagawa sa Kolehiyo ng Agham, ipinagmalaki niya: pagtataas ng pamantayang akademiko. Isang di-gradwandong estudyante ng kolehiyo ang bumasa ng papel tungkol sa laser physics sa Kuala Lumpur. Sa husay ng papel, akala ng mga dumalo ay may M.S. na ito.

IBIG NI POSADAS NA IHABOL KUNDI man ipantay ang kalidad ng agham sa kolehiyo sa pinakamagaling sa rehiyon o sa mundo. Kahit nasa pisika, alam niya ang mga pangangailangan ng iba't ibang yunit. Ayaw niyang mahuli; hindi rin sapat ang makasunod lamang; kailangang manguna. Hindi siya nasisiyahan sa maliliit; malakihan siya kung magplano. Ang bukambibig niya ay kailangang manguna ang U.P.

BILANG BAGONG CHANSELOR, SA panunumpa sa tungkulin ng ilang dekanong Hunyo 8 ay sinabi niyang iningatan ng Administrasyon ang pagpili ng mga dekanong sapagkat "napakalaki ng magagawa ng bawat isa sa inyong kolehiyo."

MARAHIL, IPINAHIHAWATIG NIYA ANG sariling karanasan. Sa isa't kalahating taon noong Associate Dean ng Division of Natural Sciences and Mathematics ng dating College of Arts and Sciences (CAS), binalangkas niya at isinakatuparan ang transpormasyon ng dalawang departamento (Physics, Geology at Geography) at isang sentro (Natural Science Research Center) upang ito'y maging mga pambansang sentrong kagalingan. Ang unang dalawa'y naging National Institute of Physics at National Institute of Geological Sciences at ang pangatlo'y Natural Sciences Research Institute. Napupukaw niya ang kagalingan sa mga guro at estudyante.

HABANG ASSOCIATE DEAN PA RIN noong 1982-1983, ngayo'y Professor na, si paniwalang uunlad lamang ang kolehiyo kung babaklas ito sa CAS, binalak at pinangunahan niya ang pagtatag ng hiwalay na Kolehiyo ng Agham. Natupad ang kontrobersiyal na separasyon noong Disyembre 1983 at siya ang naging dekanong Kolehiyo ng Agham.

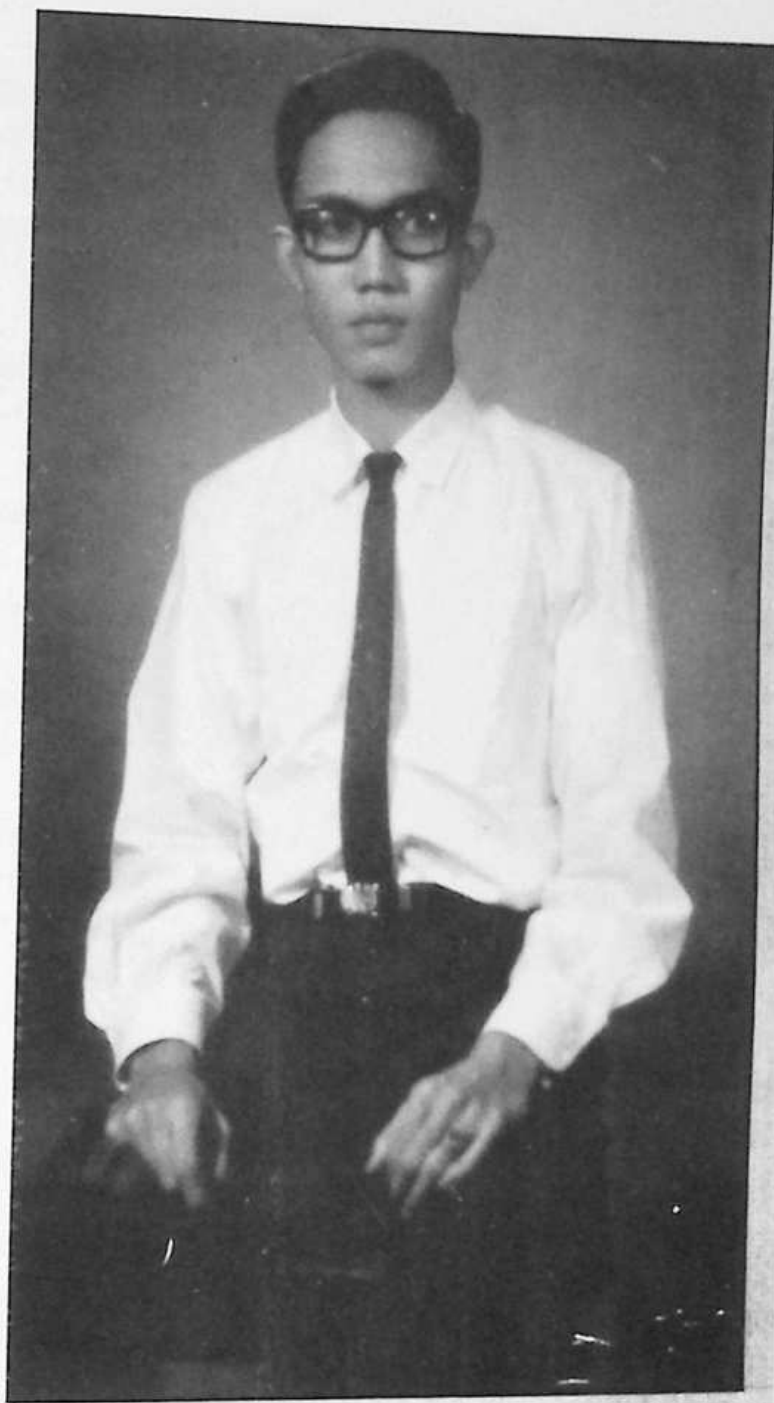

Maglilingkod siya nang dalawa pang magkasunod na term hanggang hirangang Chancellor noong Nobyembre 1, 1993. Pinatunayan ng mga pangyayari na tama siya sa paghiwalay.

KABILANG SA KANYANG NAGAWA

habang dekan: pagbubukas ng mga programa sa Molecular Biology at Biotechnology at Materials Science and Engineering; istandardisasyon ng iba't ibang programang B.S., M.S. at Ph.D.; pagkalap ng pondo para matapos ang Geology Building, at pagpapatayo ng Science Library and Administration Building, Mathematics Building at Marine Science Building. Ito ang simula ng U.P. Diliman Science Complex. Sa pagsasanay ng mga guro, 44 lamang ang may Ph.D. sa kanyang kolehiyo noong 1984; nitong 1994, naging 104 ito - kayamanan ng unibersidad na magagamit ng bansa sa pag-igpaw sa makabagong teknolohiya. Pinarangalan ni Pangulong Jose V. Abueva ang namumukod niyang serbisyo sa unibersidad noong 1993. Isinasakatuparan ni Posadas ang layunin ng Samahan ng Makabagong Siyentipiko noong 1971.

ALAM NIYANG MAY AGAM-AGAM ANG ibang kolehiyo na baka agham at teknolohiya lamang ang kanyang paburan. Siangot niya ito sa kanyang maikling talumpati nang panumpain ni Pangulong Emil Q. Javier matapos pagtibayin ng Lupon ng mga Regente ang appointment niya bilang Chanselor. "Bilang dekan," aniya, "natural na ipaglaban ko ang aking kolehiyo. Pero ngayong ako'y Chanselor, ipaglalaban ko ang lahat."

MAY PLANO SI POSADAS, ANG DI natuloy na estudyante ng PMA, ang dalubhasa sa pisika na naging aktibista. Sinasabi ng pamagat ng kanyang vison paper nang tumakbo sa pagka-Chanselor ang nais niyang gawin—"U.P. Diliman as a fountainhead of Nationalistic Culture and a Spearhead of Futuristic Technology." Ang aktibismo ni Roger Posadas ay kanya ngayong itinutuon sa pagsusulong ng U.P. Diliman—para rin sa kagalingan ng bayan.

**INAUGURAL / TALUMPATI SA
ADDRESS PAGTATALAGA**

I view the twin challenges of academic excellence and service to the nation from the perspective of national development needs and the approach of two milestones.

Turning U.P. Diliman Into A World Class Filipino University

I sought the Chancellorship of U.P. Diliman when public doubts were being raised over the quality of U.P. education. Aside from having to deal with campus squatters, fraternity rumbles, faculty squabbles, and other problems in U.P.'s flagship campus, the Diliman Chancellor would thus have to deal with two basic and crucial challenges. These are to ensure U.P. Diliman's academic excellence and to re-orient its educational programs towards serving the nation.

IT WOULD HAVE BEEN easy enough to deal with these two challenges within the existing U.P. educational framework. But I viewed the twin challenges of academic excellence and service to the nation from the perspective of national development needs and the approach of two milestones.

THE FIRST MILESTONE IS the centennial of the 1896 Philippine Revolution which gave birth to the Filipino nation in 1898. The second is the Year 2000—the gateway to the 21st century which promises to establish what Alvin Toffler calls the Third Wave.

This post-industrial civilization to Toffler's would be based on knowledge and run by a cognitariat rather than a proletariat. It would be propelled by high technologies and sustained by global economy. It would be interconnected by a worldwide network of information highways into a global village.

Sinuong ko ang tungkulin ng Chanselor
ng U.P. Diliman sa panahong may alinlangan
sa kalidad ng edukasyong U.P. Kaya bukod
sa pagharap sa mga iskwater sa kampus,
rambol ng mga fraternity, alitan ng kaguruan,
at iba pang sari-saring problema, kailangan
ko ring harapin ang dalawang higit na
mabigat na hamon. Ito ang mga hamon na
tiyakin ang kagalingang akademiko ng U.P.
Diliman at itaguyod ang isang programa ng
edukasyong naglilingkod sa bayan.

MADALI LAMANG SANANG HARAPIN

ang dalawang hamong ito sa loob ng
kasalukuyang balangkas ng edukasyong U.P.
Ngunit ang kambal na hamong ito ay
tinitingnan ko sa perspektiba ng pambansang
pag-unlad at ng dumarating na dalawang
napakahalagang pangyayari.

ANG UNA AY ANG SENTENARYO NG

Rebolusyong Filipino ng 1896 na nagsilang
sa bansang Filipino noong 1898. Ang
ikalawa ay ang *Year 2000*--ang bukana sa
21st century na inaasahang magtatatag ng
tinatawag ni Alvin Toffler na "*Third Wave*". Ang
sibilisasyong *post-industrial* ni Toffler ay
isasalig sa kaalaman. Patatakbuhan ito hindi
ng proletariat, kundi ng cognitariat.
Paandarin ito ng mga sulong na teknolohiya.
Bubuhayin ito ng isang pandaigdigang
ekonomiya at pag-uugnay-ugnayin ito ng
isang network ng mga information highways
tungo sa pagiging isang global village.

*Ang kambal na
hamong ito ay tinitingnan
ko sa perspektiba ng
pambansang pag-unlad at
ng dumarating na dalawang
napakahalagang
pangyayari.*

Gawing World-Class na Filipinong Unibersidad Ang U.P. Diliman

The Chancellor with the Regents, from left, Dr. Oscar M. Alfonso, Regent Edgardo B. Espiritu, Chancellor Posadas, Regent Nelia Gonzales, Regent Minda Formacion, and Regent Dennis L. Cunanan.

YET EVEN AS WE PREPARE FOR THE centennial of the 1896 Revolution and the 21st century, our culture has remained confused and colonial. Even more disheartening, we have not even mastered some of the most basic technologies of the 19th century such as steel making, chemical production and machine tool making.

OUR FIRST 100 YEARS AS A NATION have been a century of cultural deterioration and technological stagnation. Yet we were the first in Asia to challenge both Spanish colonialism and American imperialism. And only thirty years ago, our country was second only to Japan in economic, educational, and technological development. Today, however, our country has been left behind by most of its neighbors.

SINCE THE START OF THE 20TH century, our elite has been propagating American culture while neglecting the mastery of western technology. In contrast, Japan and other East Asian countries were able to industrialize and catch up with the advanced countries by mastering western technology while preserving their national culture.

TECHNOLOGY AND CULTURE ARE themselves the basic components of education.

Technology is concerned with the efficient and effective means of imparting knowledge and skills to students. Culture pertains to the formation of values, attitudes, and outlook as well as the development of ethical sensibilities, social responsibilities, and nationalist commitment.

IT SHOULD NOW BE understandable why U.P. Diliman should develop not only as the national center of excellence but also as the spearhead of futuristic technology and nationalistic culture.

THESE TWIN CONCERNS COMPRISE the motive force in our review and upgrading of U.P. Diliman's undergraduate and graduate programs. We will modernize the technological aspects of U.P. Diliman education and raise them to world-class standards. We will restructure and remold its cultural aspects to imbue our students with nationalistic commitment, ethical sensibilities, and social responsibility. U.P. Diliman must once again be the crucible of activist leaders both competent in their profession and nationalistic in their values and commitment.

BY REORIENTING ITS RESEARCH AND innovation activities, creative work, and extension services along the perspective of futuristic

The Chancellor with past UP-Diliman Chancellors, from left, Dr. Ernesto G. Tabujara, Dr. Emerlinda R. Roman, Chancellor Posadas, and Dr. Jose V. Abueva.

GAYUNMAN, HABANG NAGHAHANDA TAYO PARA sa sentenaryo ng Rebolusyong 1896 at sa 21st century, ang ating kultura ay nananatiling magulo at kolonyal. Ang lalong nakalulungkot, ni hindi tayo naging dalubhasa sa mga baytang teknolohiya ng 19th century, tulad ng teknolohiya sa paggawa ng kemikal, asero at makinarya.

ANG ATING UNANG SIGLO BILANG ISANG BANSA ay siglo ng paglabo ng kultura at pagtirik ng teknolohiya. Ito ay sa kabila ng pangyayaring sa Asya tayo ang unang humamon at lumaban sa kolonyalismong Espanyol at imperyalismong Amerikanó. At hanggang nitong nakaraang tatlumpung taon, ang ating bansa ay pumapangalawa lamang sa Japan sa kaunlaran sa ekonomiya, edukasyon at teknolohiya. Ngayon, napag-iwanan na tayo ng halos lahat ng ating mga kalapit-bansa.

MULA NOONG UMPISA NG 20TH CENTURY, pinalaganap ng mga naghaharing-uri sa ating lipunan ang kulturang Amerikano, samantalang kinalimutan ang pagpapakadalubhasa sa teknolohiyang kanluranin. Ang Japan at ibang bansa sa silangang Asya ay naging industriyalisado

at maunlad sa pamamagitan ng pagpapakadalubhasa sa teknolohiyang kanluranin samantalang pinayayabong ang kanilang pambansang kultura.

ANG TEKNOLOHIYAAT KULTURAANG SIYA RING dalawang batayang salik ng edukasyon. Kailangan ang teknolohiya sa mahusay at mabisang pagpapalaganap ng karunungan at kasanayan. Sa kabilang dako, kailangan ang kultura sa paghubog ng mga halagahan, saloobin, at pananaw. Kailangan din ang kultura sa paglinang ng kaloobang etiko, responsibilidad panlipunan at makabansang paninindigan.

KAYA'T MAUUNAWAAN NANGAYON KUNG BAKIT kailangang isulong ang U.P. Diliman hindi lamang bilang isang pambansang sentro ng kagalingan kundi bilang isa ring taliba ng teknolohiyang panghinaharap at makabansang kultura. ANG KAMBAL NA TUNGKULING ITO ANG nag-udyok sa aming suriin at pahasayin ang mga programang *undergraduate* at *graduate* ng U.P. Diliman. Gagawin nating moderno ang mga aspektong teknolohiko ng edukasyong U.P. Diliman. Itataas natin ito sang-ayon sa pandaigdig na

technology and nationalistic culture, U.P. Diliman can contribute directly and significantly to the technological and cultural development of our country. Without any doubt, U.P. Diliman is still the country's No. 1 in almost all disciplines. It also has the country's highest concentration of Ph.D.'s and other talents in those disciplines concerned with technology and culture such as science and engineering, the social and juridical sciences, arts and letters, education and communication, management and economics. Our researches, inventions, and innovations in futuristic technologies can surely help our country leapfrog to selected high-tech industries. At the same time, our social science research, policy studies, and artistic works can help elucidate the Filipino character, thus enriching our culture.

TO REALIZE THIS VISION, the Administration and the various colleges and regional units of U.P. Diliman have been drafting a strategic plan in coordination with the rest of the U.P. System. "U.P. Diliman 2008" intends to chart our course all the way to the U.P. centennial on June 18, 2008. But "U.P. Diliman 2008" also includes our short-term plans for the period 1994-1996 which coincides with my term as Chancellor. By the end of October 1996, we shall have realized the computerization and networking of U.P. Diliman; the modernization of our laboratory, library and research facilities; and the development of our media production facilities for distance education.

AT THE SAME TIME, WE SHALL have achieved the upgrading and modernization of our undergraduate and graduate programs. The construction of the U.P. Technology Park and the Engineering Complex in the south side of the campus near the Science Complex shall also have been started, even as the establishment of national centers of excellence in molecular biosciences and biotechnology and in marine sciences as well as the further development of the existing national centers of excellence shall have been accomplished.

FOR THE DEVELOPMENT AND promotion of a nationalistic culture, we shall revitalize the General Education Program as the heart and soul of U.P. undergraduate education through the revision of general education courses. The institution of a course on ethics and social responsibility and the establishment of a General Education Center that shall provide a centralized and coordinated administration of general education courses will be part of this revision.

A "MUSEUM OF THE PHILIPPINE Revolution" will also be constructed within the 30-hectare Arts and Culture Complex. Top priority will also be given to the shift from English to Filipino as the medium of undergraduate instruction alongside the strengthening of the English Department's programs in creative writing and English language teaching. The development of new academic programs and appropriate organizational structures for policy, area, strategic, and cultural studies will also be a major concern.

For the development and promotion of a nationalistic culture, we shall revitalize the General Education Program as the heart and soul of U.P. undergraduate education through the revision of general education courses.

MOREOVER, WE PLAN TO convert the U.P. Extension Program in San Fernando into a high-tech college geared to the needs of the Clark-Subic growth areas and to upgrade U.P. College Baguio into an auton-

pamantayan. Muli nating babalangkasin at huhubugin ang mga aspetong pangkultura nito upang ikintal sa ating mga estudyante ang makabansang paninindigan, kaloobang etiko, at responsibilidad panlipunan. Ang U.P. Diliman ay dapat muling maging pandayan ng mga lider-aktibista na mahusay sa kanilang propesyon at makabansa sa kanilang halagahan at paninindigan. SA PAMAMAGITAN NG MGA SALIKSIKAT imbensiyon, malikhaing gawain, at serbisyong ekstensiyon, makapagbibigay ng tuwiran at makabuluhang ambag ang U.P. Diliman sa pagsulong ng ating bansa sa teknolohiya at kultura. Sa halos lahat ng disiplina, ang U.P. Diliman pa rin ang Numero Unong Unibersidad sa buong bansa. Walang kaduda-duda rito. Narito pa rin ang pinakamaraming Ph.D. at ibang pambato ng bansa sa agham at inhinyeriya, mga agham panlipunan at pambatas, mga sining at panitikan, edukasyon at komunikasyon, *management and economics*.

Sa ikauunlad at ikasusulong ng makabansang kultura, muling pasisiglahin ang General Education Program upang magsilbing puso at kaluluwa ng edukasyong pang-undergraduate. Magagawa ito sa pamamagitan ng rebisyon ng mga kurso sa pangkalahatang edukasyon.

TIYAK NAANGATING MGA SALIKSIK, imbensiyon at inobasyon sa mga teknolohiyang panghinaharap ay makatutulong sa ating bansa para makaigpaw tungo sa mga piling *high-tech industries*. Sa kabilang panig, ang ating mga saliksik sa agham panlipunan, pag-aaral pampatakaran, at gawaing artistiko ay makatutulong

upang mapatingkad ang katauhang Filipino, at sa gayo'y mapayaman ang ating kultura. UPANG MATUPADANG GANITONG *VISION*, bumubuo ang U.P. Diliman ng isang planong estratehiko kaugnay ng ibang yunit ng U.P. System. Layunin ng "*U.P. Diliman 2008*" na patnubayan ang ating landas hanggang sa sentenaryo ng U.P. sa Hunyo 2008. Ngunit, bahagi rin ng "*U.P. Diliman 2008*" ang ating mga kagyat na plano para sa mga taong 1994 hanggang 1996 na siyang panahon ng aking panunungkulan bilang Chanselor.

SA PAGTATAPOS NG OKTUBRE 1996, DAPAT NA natupad na natin ang *computerization* at *networking* ng U.P. Diliman; ang modernisasyon ng ating mga laboratoryo, aklatan at pasilidad na pansaliksik; at ang pag-unlad ng ating pasilidad para sa *distance education*.

KASABAY NITO, DAPAT AY NARATING NA NATIN ang *upgrading* at modernisasyon ng ating mga programang pang-undergraduate at graduate. Sa panahon ding iyon, nasimulan na ang pagtatayo ng *Technology Park* at *Engineering Complex* sa may timog ng kampus malapit sa Science Complex. Naitatag na rin sa panahong iyon ang mga pambansang sentro ng kagalingan sa molecular biosciences at biotechnology at sa marine sciences, kaagapay ng ibayong pagpapaunlad ng mga kasalukuyang sentro ng kagalingan.

SA IKAUUNLAD AT IKASUSULONG NG makabansang kultura, muling pasisiglahin ang General Education Program upang magsilbing puso at kaluluwa ng edukasyong pang-undergraduate. Magagawa ito sa pamamagitan ng rebisyon ng mga kurso sa pangkalahatang edukasyon. Bahagi ng rebisyong ito ang pagbibigay ng kurso sa etika at responsibilidad panlipunan, at ang pagtatayo ng General Education Center. Ito ang magbibigay ng sentralisado at koordinadong pamamahala sa mga kurso ng pangkalahatang edukasyon. Itatayo din natin ang Museo ng Rebolusyong Filipino sa loob ng isang Arts and Culture Complex sa kampus na may tatlungpung ektarya ang laki.

I ask you to create in U.P. Diliman a culture of research and creativity, an environment of intellectual ferment and interdisciplinary cooperation, and a model community of devoted teachers, productive researchers, and creative artists. You have the noble missions . . . of helping generate new knowledge, new technologies, new policies, and new artistic works for our country's national development.

mous regional college within the U.P. System.

AS WE EMBARK UPON these projects, however, we have to call on the faculty, staff, and students to rededicate themselves to U.P. and to our country. We must revive the traditional U.P. Oblation's spirit of service and bind ourselves to work together towards the development of U.P. Diliman into a world-class Filipino university.

MY COLLEAGUES IN THE faculty, who are underpaid and overworked and who are expected to produce world-class research and creative works with third-class facilities, I ask you to create in U.P. Diliman a culture of research and creativity, an environment of intellectual ferment and interdisciplinary cooperation, and a model community of devoted teachers, productive researchers, and creative artists. You have the noble missions of developing the skills and character of our leaders in various fields and of helping generate new knowledge, new technologies, new policies, and new artistic works for our country's national development.

TO THE MEMBERS OF U.P. DILIMAN staff: I ask for your understanding, cooperation and support as we try to streamline our bureaucracy, reengineer our processes, and computerize our major operations. I call on all of you to help us transform U.P. Diliman into a model institution of excellent service.

TO OUR STUDENTS WHO HAVE been given a rare privilege and a high government subsidy to be able to study in U.P. Diliman: I call on each of you to live the spirit of the 1896 Philippine Revolution that was led by the heroic youth of that time. I call upon

you to breathe life to the activism that once gave this campus the distinction of being the vanguard of the nationalistic commitment and idealism that

U.P. has always been known for. I CALL ON OUR ALUMNI AND friends to continue supporting U.P. Diliman through professorial chairs, fellowships, faculty incentive grants, and other endowments. Because U.P. is already getting a lion's share of the government budget for higher education, it cannot expect to get substantial budgetary increases in the coming years. So if U.P. is to continue improving its programs it must increasingly rely on alternative sources of funds from our alumni and friends.

I WISH TO THANK THE PRESIDENTS and official representatives of Philippine universities and colleges for their attendance and felicitations. I assure you that U.P. Diliman will always be ready to work with you for our mutual benefit and for the improvement of Philippine education.

TO THE HEADS AND OFFICIAL representatives of foreign universities and other institutions of higher learning: I am truly honored by your attendance. Please be assured that even as we emphasize the need for a nationalistic culture in U.P. Diliman, we will maintain international

character of our academic programs and welcome relationship of mutual exchange and cooperation with your respective institutions.

TO THE GENERAL PUBLIC, I WISH to say: U.P. Diliman is an invaluable national resource worthy of our people's continued support. With everyone's help and cooperation, I am sure that we can make U.P. Diliman a world-class Filipino university we can all be proud of.

Hinihiling ko sa inyo na bumuo tayo sa U.P. Diliman ng isang kultura ng pananaliksik at pagkamalikhain, kaligirang mga intelektual ferment at kooperasyong interdisiplinaryo. Gawin natin itong modelong komunidad ng mga masigasig na guro, produktibong mananaliksik at malikhaing artista. Marangal ang ating misyon na . . . tumulong sa pagpapasibol ng bagong kaalaman, bagong patakaran, at bagong akdang makasining para sa ikauunlad ng ating bansa.

MAGIGING PRIORIDAD ANG MALAWAKANG implementasyon ng paggamit ng Filipino imbes na Ingles bilang wika ng pagtuturo sa undergraduate. Kasabay nito ang pagpapalakas ng programa ng English Department sa malikhaing pagsulat at sa pagtuturo ng wikang Ingles. Prioridad din ang pagbubuo ng mga bagong programang akademiko at angkop na estruktura ng organisasyon para sa policy, area, strategic at cultural studies. Ipinaplano nating gawing high-tech college and U.P. Extension Program sa San Fernando na nakatuon sa pangangailangan ng Clark-Subic growth areas, at pasisimulan ang mga hakbang para maging awtonomong kolehiyong rehiyonal ang U.P. College Baguio sa loob ng U.P. System.

HABANG PINASISIMULAN NATIN ANG MGA proyektong ito, dapat tayong manawagan sa mga guro, kawani at estudyante na muling ialay ang kanilang sarili sa U.P. at sa bansa. Muli nating buhayin ang tradisyonal na diwang "pahinungod" ng U.P. Oblation at magkaisa tayong itaguyod ang pagiging world-class na Filipinong unibersidad ng U.P. Diliman.

MGA KASAMAHAN KO SA KAGURUAN NA tambak sa trabaho pero kulang sa suweldo at inaasahang makagagawa ng mga world-class na pananaliksik at malikhaing akda sa pamamagitan ng mga third class na gamit at pasilidad, hinihiling ko sa inyo na bumuo tayo sa U.P. Diliman ng isang kultura ng pananaliksik at pagkamalikhain, kaligirang mga intelektual ferment at kooperasyong interdisiplinaryo. Gawin natin itong modelong komunidad ng mga masigasig na guro, produktibong mananaliksik at malikhaing artista.

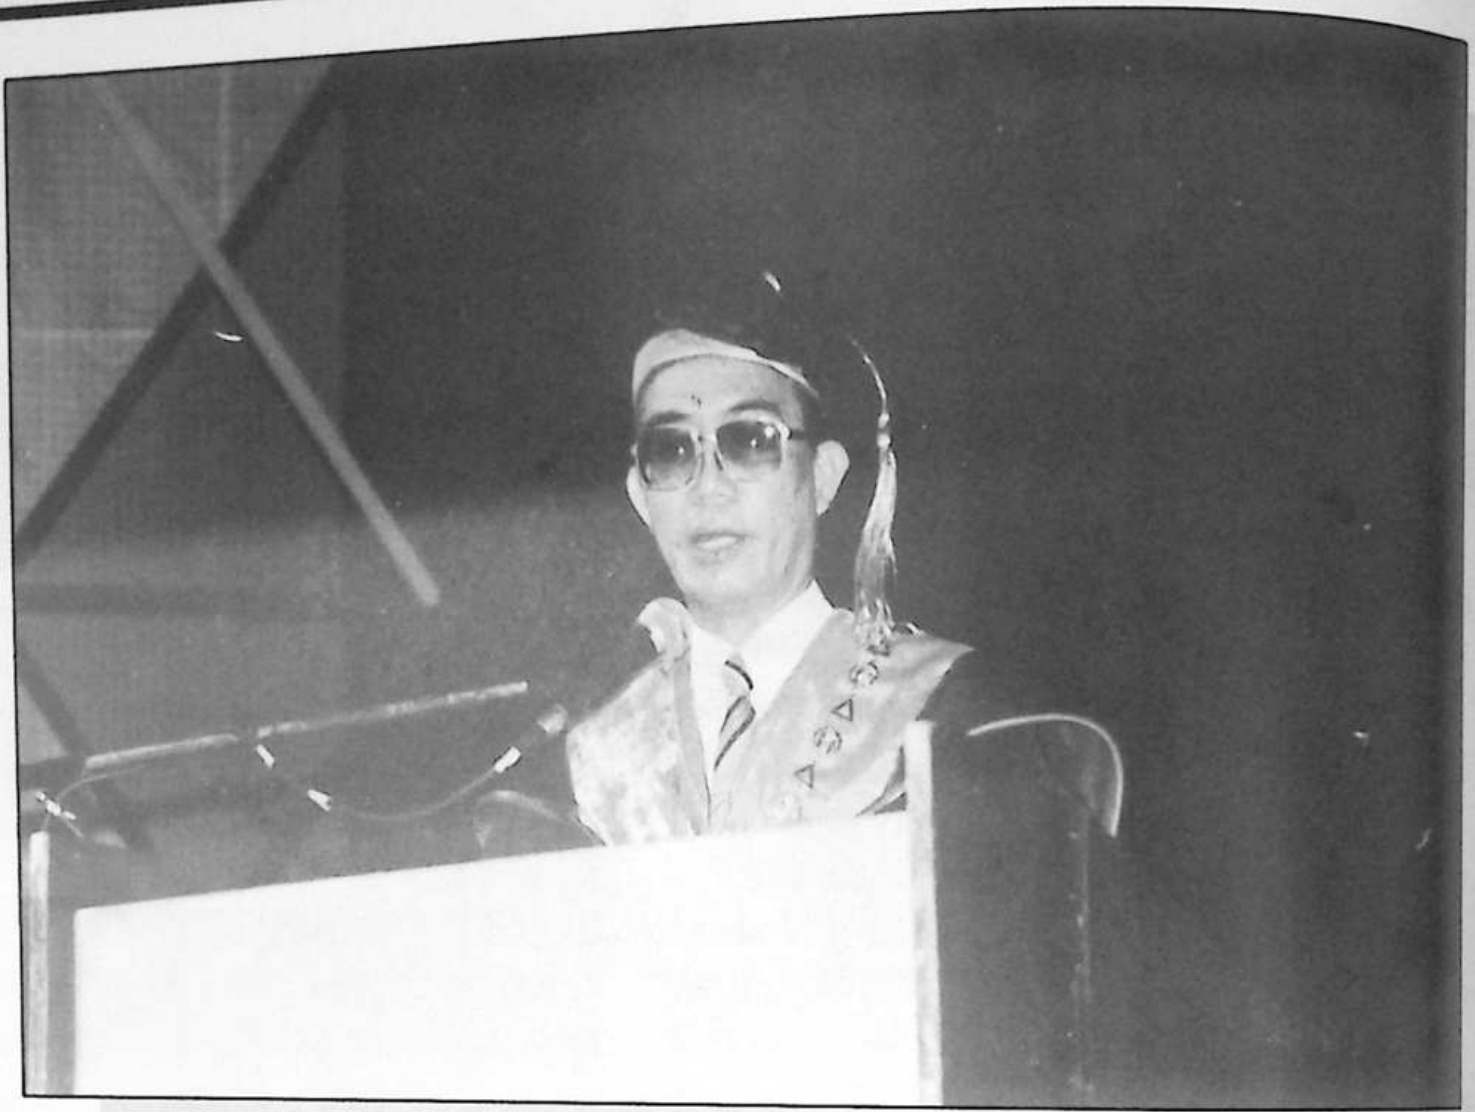

Marangal ang ating misyon na hubugin ang talino at ugali ng mga magiging lider ng ating bansa sa iba't ibang larangan, at tumulong sa pagpapasibol ng bagong kaalaman, bagong patakaran, at bagong akdang makasining para sa ikauunlad ng ating bansa.

SA MGA KAWANI NG U.P. DILIMAN, HINIHILING ko ang inyong pag-unawa, pakikipagtulungan, at pag-suporta habang sinisikap nating ma-streamline ang ating burukrasya, ma-reengineer ang ating mga proseso, at ma-computerize ang ating mga pangunahing gawain. Nananawagan ako sa inyong lahat na pagsumikapan natin na maging modelong institusyon ang U.P. Diliman sa mahusay na serbisyo.

SA ATING MGA ESTUDYANTE SA U.P.

Diliman, na binibigyan ng pambihirang pribilehiyo at tulong na salapi ng pamahalaan, tinatawagan ko kayo na isabuhay ang diwa ng Rebolusyong Filipino ng 1896 na pinangungunahan ng mga bayaning kabataan ng panahong iyon. Tinatawagan ko kayo upang muling bigyan ng buhay ang aktibismo na nagbigay sa kampus na ito ng tatak at katanyagan bilang taliba ng idealismo at makabansang paninindigan.

TINATAWAGAN KO ANG MGA ALUMNI AT kaibigan ng U.P. na ipagpatuloy ang pagtangkilik sa U.P. Diliman sa pamamagitan ng professorial chairs, mga fellowship at incentive grants sa mga guro. Sapagkat ang U.P. ay tumatanggap na ng malaking bahagi ng badyet ng gobyerno para sa mataas na edukasyon, hindi na natin maaasahan pang tumanggap ng malaking dagdag na pondo sa mga darating na taon. Kaya't para maipagpatuloy

Chancellor Posadas delivering the inaugural address

ng U.P. ang pagpapaunlad ng mga programa nito, mangangailangan ito mga alternatibong mapagkukunan ng pondo mula sa mga alumni at kaibigan ng U.P.

SAMGA PANGULO AT OPISYAL NA KINATAWAN ng iba't ibang kolehiyo at unibersidad sa Pilipinas, salamat sa inyong pagdalo at pakikigalak sa pagdiriwang na ito. Nais kong tiyakin sa inyo na laging handa ang U.P. Diliman na makipagtulungan sa inyo para sa kapakanan nating lahat at lalo na para sa ikaaangat ng edukasyon sa Pilipinas.

TO THE HEADS AND OFFICIAL
representatives of foreign universities and other
institutions of higher learning: I am truly honored by

your attendance. Please be assured that even as we emphasize the need for a nationalistic culture at U.P. Diliman, we will maintain the international character of our academic programs and we welcome relationship of mutual exchange and cooperation with your respective institutions.

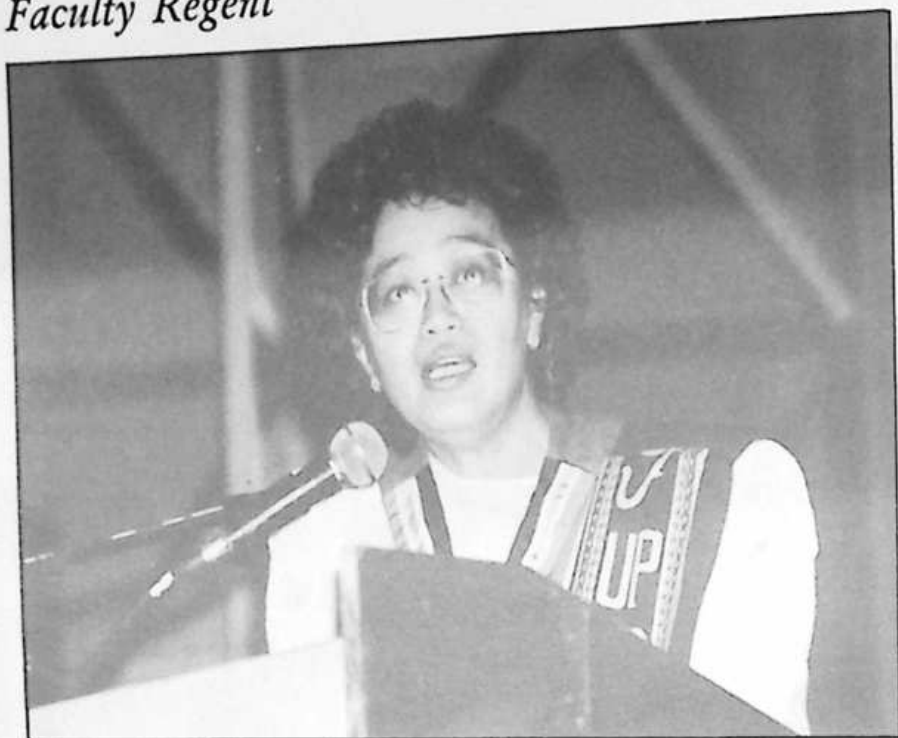

AT SAMGA KABABAYAN NATIN, NAIS KONG ipahayag na ang U.P. Diliman ay isang napakahalagang pambansang yaman na karapatan sa patuloy na pagtangkilik ng buong sambayanan. Sa tulong at pakikiisa ninyong lahat, natitiyak ko na magagawa nating isang world-class na Filipinong unibersidad, na maipagmamalaki nating lahat, ang U.P. Diliman.

MESSAGES

Former Chancellor

EMERLINDA R. ROMAN

Faculty Regent

E. R. Roman

Papuri at pagbati kay Dr. Roger Posadas sa okasyon ng pagtatalaga sa kanya bilang ika-limang Chanselor ng U.P. Diliman. Batid ko ang kakayahan ni Dr. Roger Posadas bilang lider akademiko at administratibo. Sa kanyang pamumuno sa Kolehiyo ng Agham bilang dekanong nito sa loob ng sampung taon, naipamalas niya ang dedikasyon, katatagan at determinasyon upang maisulong ang kolehiyo hanggang sa ito ay tingalaing sentro ng kagalingan sa siyensiya sa buong bansa.

At siya ay naging matagumpay.

MAPALAD ANG U.P. DILIMAN SA pagkakaroon nito ng isang lider na may malawak na karanasan sa pagsusulong ng institusyon. Hangad ko ang tagumpay ni Dr. Roger Posadas at ng U.P. Diliman sa layunin nitong maiangat ang institusyon sa antas na kinabibilangan ng mga mahuhusay at pangunahing unibersidad sa buong mundo. Magsamasama tayo sa paglikha ng kapaligirang tatangkilik at aangkop sa pangangailangan ng tao at ng bayan. At sa pagbubuklod natin, huwag sanang mawala sa atin ang kahalagahan ng patataguyod ng layang akademiko na siyang nagbibigay sigla sa buhay ng isang unibersidad.

EDGARDO B. ESPIRITU

Regent

E. B. Espiritu

Mga kapatid at kaibigan sa pamantasan
magandang hapon sa inyong lahat

Karangalan ko po ang makasama kayong lahat ngayon
upang saksihan ang imbestityur ni Dr. Posadas, bilang
Chanselor ng Pamantasan ng Pilipinas dito sa Diliman.

NATITIYAK KONG ANG PAGHIRANG NA ITO AY

tinatanggap ng lahat nang buong tuwa at pagsang-ayon batid pa naman
natin ang mga kakayahan at katangian ni Dr. Posadas bilang guro,
dekano at tagapamalakad, maraming taon din and ginugol niya sa
pagsisilbi sa ating pamantasan at kung sakaling kailangan pa ng dagdag na
patunay, masasabi ko pa nang buong tiwala na karapatdapat siya sa
bagong katungkulang ito.

UNA, TAGLAY NIYA ANG MAIGTING NA PAGMAMAHAL SA

malayang pagaaral sa gayon ay maitataguyod niya nang lubos ang mga
simulain at tradisyon ng ating pamantasan bilang pangunahing
institusyon ng edukasyon at kultura sa ating bansa. Pangalawa, subok
na ang kanyang kahusayan, hindi lamang sa agham at iba pang
kaalamang pang-intelektuwal, kundi maging sa pamumuno at pagiging
bihasa sa mga praktikal na sistema at pamamaraan. Dala-dala niya sa
tungkuling ito ang kanyang karunungan at mayamang karanasan sa
gayon makakaasa tayo sa isang pamamahalang masusi, epektibo, at
makatarungan. Nanalig ako sa kakayahan ni Dr. Roger Posadas
sa lahat ng ito.

BILANG KAIBIGAN AT PANGULO NG U.P. ALUMNI

Association, nakikiisa ako sa mga layunin ng ating bagong Chanselor.
Nangangako ako ng personal na pagtulong at kasabay nito ang aktibong
pagsuporta ng buong samahan sa kanyang mga proyekto at programa.
Tanging sapagbabalikatan nating lahat maitataguyod ang kabutihan ng
mahal nating pamantasan, katulad ng dati, laging handang
makipagtulungan ang UPAA.

KAY DR. ROGER POSADAS,

sa kanyang mahal na ginang at pamilya, ang taos pusong pagkilala at
pagbati.

Representing the U.P. Faculty

ESTER A. GARCIA

Commissioner on Higher Education

Ester A. Garcia

Si Dr. Posadas, ang bagong Chanselor ng U.P. Diliman, ay kapwa ko siyentipiko at guro, isa rin

siyang kaibigan at kasama.

HINDI BIRO ANG PANGANGASIWA SA U.P. Diliman. Mabuti na lamang at mayroon tayong Chanselor na handang-handa para sa gawaing ito. Matagal ko nang kilala si Roger, noon pang early 70s. Sa kabila ng sinasabi nilang mahirap siyang lapitan, isa siyang magaling na pinuno. Nakumbinsi niya ang mga tao na maglingkod at makipagtulungan sa kanya kaugnay ng mga isyu at programang kanyang itinataguyod. Napakalaking ng kanyang mga simulain kaya naaakit ang ibang tao sa kanyang mga idea. Isa na ako sa mga ito.

ITINAYO AT PINAMUNUAN NIYA ANG ISANG grupong talakayan na binubuo ng mga batang Ph.D. nababahala sa mabagal na pag-unlad ng agham sa bansa. blacklist pagkaraan ang organisasyong ito at naging detinadong politikal ang ilan sa amon.

PAGLABAS SA BILANGGUAN, MULING napakinabangan ang bisyon at husay sa pag-oorganisa ni Roger Posadas. Itinaguyod namin ang paghiwalay ng Agham Matematika mula sa Kolehiyo ng Sining at Agham para bumuo ng bagong kolehiyo. Tinulungan niya kami sa paglalatag ng plano para sa bagong kolehiyo at estratehiya sa pangangampan.

para sa paghiwalay mula sa CAS. Nakatulong din ang kanyang husay sa pangungumbinsi para makumbinsi ko naman ang dating Pangulong Angara para maglaan ng malawak na lote ang U.P. para sa Kolehiyo ng Agham.

NAGTATAKA ANG ILAN KUNG PAANO nakakuha ng pondo si Roger Posadas para sa Kolehiyo ng Agham, lalo na noong kalagitnaan ng dekada 80 na panahong mahirap ang pondo. Ang daloy ng pondo para sa Kolehiyo ay hindi sanhi ng mabuting kapalaran o gantimpala ng nasa sa itaas. Kinailangan niyang kumbinsihin ang mga Administrasyong U.P., Department of Budget Management, at ang National Science Development Board sa kahalagahan ng Agham at Mga Bagong Teknolohiya para sa simulain ng bansa para sa industriyalisasyon. Kahit para siyang tinig sa disyerto, walang sawa siyang nagsikap para sa kanyang layunin. Marami ang nakinig at sumuporta sa kanya.

BILANG PAGSUPOORTA SA AGHAM, nag-organisa siya ng isa pang grupong tinatawag na Kilusan ng mga Siyentipikong Pilipino. Kasama sa grupong ito si Fr. Nebres ng Ateneo, Dr. William Padolina ng UPLB, ang yumaong Propesor Salvador Gonzales ng De La Salle, at iba pa. Nag-lobby kami sa National Research Council of the Philippines para dagdagan ang bilang ng dibisyon sa Agham para madagdagan din ang aming parte sa pondo. Hinikayat namin ang NSDB para sa pagtatayo ng mga sentro ng kahusayan. Pinilit namin ang gobyerno na magtayo ng isang hiwalay na sanggunian sa ilalim

ng NSDB (DOST ngayon) para umasikaso sa agham at matematika at mga bagong teknolohiya. Lahat ng mga pagsisikap na ito ay para maisainstitusyon ang suporta sa agham.

BAKIT MAY NAAAKIT MAKITRABAHO sa taong ito na bihirang ngumiti? Sa palagay ko, nangyari ito dahil kumbinsido sila na kumikilos siya hindi para sa personal na kabutihan kundi para sa isang mas matayog na simulain. Noong isang linggo lamang, nag-usap kami tungkol dito ni Fr. Nebres ng Ateneo. Ganito ang paliwanag niya. Kailangan ng pisika (at iba pang disiplina ng agham) ang isang taong magpapaunlad sa Pisika bilang isang disiplina sa Pilipinas — kahit mangangahulugan ito ng pagsasakripisyo sa sariling karera. Ito'y wala nang iba kundi si Roger. Siya ay isang teoretikal na physicist na nagbigay halaga sa pangangailangang magkaroon ang bansa ng mga eksperimental na physicist. Kahit nakakaapekto ito sa kanyang karerang siyentipiko, mas pinagtuunan niya ang pisikang eksperimental.

KAPAG NAGHANAP NG PONDO SI Roger, hindi ito para sa sariling saliksik kundi alang-alang sa Pisika, at higit sa lahat, sa ngalan ng Agham. Bilang Chanselor ng U.P. Diliman, maglilingkod siya ngayon sa buong U.P. Diliman. Dahil kilala ko siya bilang maasahang tao at alam ko ang mga nagawa niya para sa agham, tiyak akong sa kanyang pamumuno, nasa mabuting kamay ang U.P. Diliman.

GENEROSO U. LOPEZ

**Chairman
Education & Scholarship Committee
ONAPUP**

Generoso U. Lopez

**Mensahe ng ONAPUP-Diliman sa Investiture ni
Chanselor Posadas**

NAGPUPUGAY ANG PAMUNUAN NG
Organization of Non-Academic Personnel-U.P. Diliman
sa pagkakaloob ng kapangyarihan kay Dr. Roger Posadas bilang
panglimang Chanselor ng U.P. Diliman.
BAGAMA'T NAKAPANUMPA NA SA TUNGKULIN,
mahalaga pa rin ang investiture ni Chanselor Posadas dahil
ngayon ay sumasang-ayon sa harap ng publiko ang pangulo ng
pamantasan sa kanyang kakayahang pamunuan ang
U.P. Diliman.

SA PAGTANGGAP NI CHANSELOP POSADAS NG
mace ng U.P. Diliman, tinatanggap niya ang lahat ng karapatan at
responsibilidad na kaakibat ng kanyang tungkulin.
AYON NA RIN KAY DR. POSADAS, BILANG
Chanselor ay nais niyang gawin ang U.P. Diliman hindi lamang
pambansang sentro ng kahusayang akademiko kundi bilang
bukal ng nagpapanibagong kultura at
sumusulong na teknolohiya.

GUSTO RIN NIYANG IANGAT ANG PROGRAMA
sa pagtuturo, pananaliksik at ekstensyon o paglilingkod sa
pamayanan, ang palaguin ang pantao, impra-ekstruktural at
pinansyal na kayamanan, at rebesahin ang pamamalakad at
proseso sa U.P. Diliman.

TUNAY NA ANG PANANAW AT MGA ADHIKAIN
ni Chanselor Posadas na nakatuon sa pagpapalawak at
pagpapaunlad ng kultura at teknolohiya ay malaking bagay na
makakaambag sa pagsulong ng pamayanan ng Diliman ay naging
daan upang mapalapit siya sa puso ng karaniwang
manggagawa ng pamantasan.

DAHIL PO SA AMING MATIBAY NA PANANALIG
sa kanyang liderato at kakayahan, walang pasubali na nasa
likuran niya kami upang epektibo niyang maisakatuparan ang
mga nakalahad na programang may kaugnayan sa pagsulong ng
mabuting relasyon ng mga manggagawa at ng administrasyon.

AT SA LAHAT NG MAGANDANG BALAKIN AT
kasalukuyang magagandang ginagawa ni Chanselor Posadas,
nakahanda ring tumulong ang ONAPUP-Diliman.
KAYA SA INYO KAGALANG-GALANG NA
Chanselor Posadas, nawa'y kasihan at patnubayan po kayo ng
Maykapal sa pagtupad ninyo sa tungkuling nakaatang
sa inyong balikat.

MABUHAY PO TAYONG LAHAT!

Representing the U.P. Students

DENNIS L. CUNANAN

Student Regent

Dennis L. Cunanan

Pagpupugay

ANG ARAW NA ITO NG OPISYAL NA PAGTATAKDA kay Dr. Roger Posadas bilang Chanselor ng Unibersidad ng Pilipinas sa Diliman, Lungsod ng Quezon ay bababa sa kasaysayan bilang araw din ng pagtatakda ng paninindigang maglingkod at magsilbi sa mga guro, manggagawa, kawani't mag-aaral ng pamantasan. Ang araw ding ito ay kikilalanin bilang panahon ng ibayong panunumpa ng pag-aalay ng sarili sa pamantasan at sa lipunan.

AYON SA MGA KWENTO-KWENTO NG

mag-tatanong ang mga mag-aaral kung sino at ano ang pagkatao ng isang nagnangalang Dr. Roger Posadas, ang kaagad at unang siguradong sinasabi sa amin ay, isa siyang aktibista ng panahon ng Diliman Commune at higit na tanyag sa kanyang galing na gumawa ng molotov bombs. Susunod dito ay ang pagkilala sa kanya bilang dating dekanong ng College of Science na siyang namumuno ng pagkatatag ng mga bagong istruktura at pasilidad para sa mga mag-aaral ng kolehiyo. At huli dito ay ang pagkilala rin sa kanya bilang tatay ng kaka-tapos lang na Summa Cum Laude na si Agham Bayan.

NGAYON, HIGIT KAILAN MAN, UMAASA ANG MGA mag-aaral ng pamantasan na patuloy na tatayo si Dr. Posadas bilang isang radikal na aktibista na magsusulong ng karapatan at kagalingan ng lahat ng bumubuo sa komunidad ng U.P.

Diliman. Kasama ng naising ito ang tinig at lakas ng mga mag-aaral na patuloy na nagiging kritikal, radikal, aktibista na nag-aaral, nagsisilbi at nakikibaka.

SABAY-SABAY AT KAPIT-BISIG NATING IALAY ANG sarili para sa pamantasan at para sa bayan.

PAGPUGAY KAY CHANSELOR ROGER POSADAS!

Mabuhay ang mga Mag-aaral! Mabuhay ang U.P.!

ARTICLES/REPRINTS

A VISION FOR SCIENCE

*Leading the way to technological advance,
UP is into a catch-up strategy with Asia*

By Arnold Molina Azurin

Can UP do it?

CONTRARY to conventional cynicism, the country's advance in science and technology is not as slow as that of the medieval age. Very efficient chainsaws, bulldozers and pulp-processing plants are used in denuding the range. Vegetable growers in the Cordillera use cyanide as pesticide and fishers in Quezon province use the same chemical to stun fish before hauling them in. From Pangasinan to Jolo, sodium nitrate is mixed with gasoline, stirred and wind-dried carefully and then poured as a chemical explosive into soft-drink bottles, sealed with a home-made wick—and presto—a blast fisher is technologically equipped to blast the fish out of their coral lairs.

But such misuse of science and technology should not blind us to the achievements of Filipino scientists in agronomy, biochemistry, pest control, plant hybridization, geology and mathematics, for which they have won world acclaim. The sordid use of science and technology is highlighted here because the practice prevails in the countryside,

impelled by the desperate pragmatism of impoverished folk.

Notable in this extensive deployment of such technology is its quick and wanton devastation of the environment, or its direct opposition to the sustainability of natural resources. Equally noteworthy is that the sourcing of this plundering technology—whether bulldozers, chemicals or modern fish nets with fine mesh—is through Metro Manila agents of foreign manufacturers.

While it is grossly naive to regard these technological products and processes as destructive by themselves, their current deployment in the Philippines points up a most misappropriate transfer of technology. More important, it illustrates the erratic policies, or a snail's pace in the country's research and development programs which makes the Philippines a ready market for foreign technologies.

Chancellor Roger Posadas of UP Diliman, himself a well-known scientist and educator, explains why the badly needed surge in science and technology has been so slow in coming. First, government policies give low priority to science, research and development.

Second, economists in the bureaucracy have yet to wean themselves from lavish dependence on foreign technology. Third, businessmen who can stimulate research and development for their industries lack the attitude to assimilate and innovate processing technologies.

Says Posadas: "All these years our manufacturing levels have remained at the operative level. We know how to run the imported machinery, but we have yet to learn how to design them and make our own machines."

Corrupt culture. His overview on the causes of the sluggish pace of technology development is not confined, however, to the lack of priority in scientific research. The cultural environment has much to do with such slow progress: "Over the past nine decades our nation has made hardly any progress in what I consider to be the two most important factors in national development: culture and technology."

"The nationalistic culture that our heroic foreparents had forged... that had made Filipinos the proudest people in all of Asia during the last years of the 19th century has, alas, deteriorated into a

confused, colonial, corrupt culture. At the same time, our country's technological capabilities in general have not advanced much beyond those of the 19th-century vintage."

But other analysts could very well ask, isn't this reference to culture as crucial to technological advance not a mere alibi, since others cherish the vision that the spread of science and technology would compel cultural change, not the other way around?

Posadas debunks this deterministic oversimplification by using the historical experience of Japan: "The Japanese were probably the first people in history to grasp the key importance of the culture-technology coupling to national development, for when they embarked on their modernization drive in the 1870s after the Meiji Restoration, they followed the formula 'Japanese culture, Western technology,' using their nationalism to assimilate and master Western technology and making their rapid technological catch-up enrich and reinforce their nationalistic culture."

Reversal. "In our case, however, we followed the reverse formula, Western culture, Filipino technology, and so today we find ourselves approaching our nation's centennial with a colonial culture and staggering toward the 21st century with 19th-century technological capabilities."

This nationalist scientist also sees the Japanese model in modernization as equally evident in the recent rise of South

Korea, Taiwan and other Asian countries that have bypassed the Philippines in developing their industrial capabilities. Posadas's summation: "we must foster nationalistic, scientific, technophilic, and challenging culture if we want to achieve rapid technological

Posadas at the groundbreaking rites of the science and technology park in UP; Inset: Ambitious plans

Reprint of Arnold Molina Azurin's article published in the *Philippine Free Press*, July 23, 1988, entitled "A Vision for Science"

catch-up... it is imperative that we now follow the formula, "Nationalistic Culture, Futuristic Technology," if we want our country to ride the Third Wave [Alvin Toffler's famous scenario] into the 21st century rather than founder in it."

Tall order or tall story? Evidently, Posadas's well-crafted slogan stressing the dynamics of nationalistic culture and futuristic technology is as old as Rizal, who gave hints of it in his essays such as "The Philippines a Century Hence," but they were unfortunately waylaid in the course of the American wave of colonization. And so, the resultant culture has reinforced the westernization of Filipino values and attitudes imposed by the Spaniards. Thus, when Japan invaded the Philippines, a top Japanese propaganda official had to lament the extreme difficulty of supplanting the colonial, consumerist and elitist mentality among many Filipinos "raised in the convent for 400 years and enchanted by Hollywood for 40 years."

Today the nonchalant observers cozy with the status quo might say, that's water under the bridge. But is it? Posadas, a martial-law detainee, obviously does not subscribe to such a facile view. Or why should he emphasize in his vision of scientific education the wellsprings of nationalism to irrigate the seedbeds of technological innovation?

In fact, he doesn't mind reiterating the rhetoric of Filipino historians in explaining his own policy orientation as the new chancellor of UP Diliman. There we indeed echo of Claro Recto and Renato Constantino in his underscoring of the vitality of history to a sense of the future: "There are two milestones in our nation's near future that any worthwhile vision for UP Diliman must keep in sight. The first consists of the centennials of the 1896-1898 Filipino war of national liberation against Spanish and American colonialisms... the second milestone is the turn of the century from the 20th to the 21st which will occur just six years from now."

And he cites these historic milestones as the spurs in his stewardship of the premier state university which he hopes to help push in becoming "not only the national center of academic excellence but also a fountainhead of a nationalistic cultural renaissance and a spearhead of a futuristic technological advancement."

Stoganeering aside, Posadas does explain more casually his ideal of UP and its graduates: "I would like to see the emergence of science and engineering graduates with the social commitment to serve the needs of their country, rather than the other richer countries."

"The development of expertise should be accompanied by the development of proper values that flesh out a sense of nationalism and professional ethics."

Beyond a doubt, Posadas's dream is to cast off the current image of UP students caricatured last year in the dailies as "spoiled brats who clutter the campus with cars," to use the words of a nationalist

assessing the current problems besetting UP, political science professor Francisco Nemenzo says: "Financial difficulties make the UP vulnerable to pressures from without. As the senior professors get more involved in consultancy work, they also develop loyalties to the corporations and agencies they serve. The academic values they once upheld are now subordinated to the values of these corporations and agencies."

This problem involving individual teacher even impinges on the institutional structure. Nemenzo bemoans how "colleges and research institutes design their programs to suit the agenda of potential funding sources. Thus the university has grown, not in accordance with the academic community's independent perception of what the country needs, but in response to possibilities for external endowments."

Hence the university according to some critics has expanded into a "multiversity" overgrown with disparate orientations.

Another professor, Felipe Miranda, puts this facet of multiversity with more levity: "Each doctorate from a foreign university comes back to UP as a singular agent of a school of thought of his or her host institution, recommending to the students an entire set of books used in the sojourn abroad."

Philosophy professor Andresito Acuña describes this alien learning as "an importation of foreign ideas expressed in foreign jargon," in stressing the impertinence of borrowed concepts untested in the local culture.

Sociologist Gelia Castillo zeroes in on the fractions approach generated by overly specific fields of study and advocacy: "As it is, issues of gender, children and household economics seem to have overshadowed problems of the *Filipino family as family*."

And as to general climate of diaspora of the curricular program, Castillo adds: "Perhaps it is nostalgia, but somehow UP seems to have lost some of its intellectual cohesion and wholeness when the College of Liberal Arts was split into four separate units. The old [setup] had an established tradition of liberal education, such as in

the spirit of thinking beyond one's major field of specialization.

"The graduates regarded themselves more as liberal arts graduates and less as sociology, psychology, etc. majors. Prevalent was the spirit of liberal arts, not of social science, physics or mathematics," Castillo concludes in wistful retrospect.

In this *sari-sari* store situation of the curricular program, the students cannot help being molded by a narrow view of personal or professional growth. The development of nationalistic culture as envisioned by Posadas as a major objective of his chancellorship may hardly find fertile ground in the university's current climate of ideas. More particularly under the "universalist" and mystifying cloud of foreign theories and ideologies like postmodernism, poststructuralism, etc. that has given "validity" to eccentric re-interpretation of Philippine reality, such as when one instructor in "gay discourse" did propose in a public lecture to put priority on gender studies and "put the [quest for] nation in abeyance" for the moment.

Undaunted. How then can a nationalistic culture be germinated in the premier state university, given the cracked and parched soil?

Fortunately, Posadas is not daunted by such lavishly specific orientations. He intends to confront this issue by having "our general education revised, revitalized and readministered through a General Education Center in order to give this program pride of place as the heart and soul of UP education."

Toward this goal, he is pushing for "the development of interdisciplinary programs in such fields as area studies, strategic studies, environmental studies, futuristic studies, and technology-management studies in response to the increasing globalization of business and other activities." Alongside is the accelerated shift from English to Filipino "while seeking funding for the establishment of a UP English Language Training Center for our Asian neighbors."

Computer-based educational technologies shall also be explored. As to the prospect of developing "futuristic technology" in UP, this may be realized in the near future—way ahead of the "nationalistic cultural renaissance" which indeed requires an uprooting of the specialists' *sari-sari* store syndrome. It has been in science and technology where UP's intellectual tradition is without peer in this country, although in Asia it is now engaged in a catch-up strategy. This week, nine of this year's Ten Outstanding Young Scientists awarded by the National Academy of Science and Technology are UP faculty members.

★

Blast fisher at work: Grassroots technology?

teacher.

Bold measures. For such valorous vision to reverse the perceived trend among UP students (as mostly impelled by professional advancement but with a declining social commitment) the basic question any visionary must confront is, can the premier state university experience a turnaround, given its financial constraints and the highly specialized character of its academic bureaucracy? After all there is little doubt that the quality of the mindsets and national commitment of its students are based on the quality of enrollees UP attracts, and based as well on the quality and morale of the faculty enriching their minds.

These appear to be an overall disjointedness even in the academic turfs that have mushroomed, engendered by specializations and resulting compartmentalization of curricular offerings. In

SCIENCE, NATIONALISM and ROGER POSADAS

By JOSE MAGPANTAY

A renowned scientist and progressive professor pursues his vision of the University of the Philippines as a "fountainhead of nationalistic culture and spearhead of futuristic technology."

Reprint of Dr. Jose Magpantay's article published in the *Philippine Graphic*, October 7, 1994, entitled "Science, Nationalism and Roger Posadas"

It was June 1970 and a small class of third-year physics majors at the University of the Philippines was waiting for the arrival of their much talked-about professor in mechanics.

The professor, a twenty-five-year old Ph.D. from the University of Pittsburgh, was a General Relativity specialist. The physics majors were excited, for they were about to take their first serious physics course under a descendant—professionally, that is—of Albert Einstein.

The young professor had published several papers on Einstein's theory. No Filipino had done that before. And none of their teachers in the lower physics courses had published anything in the international journals. So the majors felt that they were about to be taught physics the way it should be taught, as an exciting, alive and evolving body of knowledge quite unlike the usual stuff found in textbooks.

The General Relativist who so impressed that class nearly 25 years ago was Roger Posadas. He obtained his B.S. Physics degree from the UP in 1964, taught for one year with the old Department of Physics, and then went to the University of Pittsburgh in Pennsylvania, USA, on a Rockefeller Foundation fellowship for his Ph.D. Socially, he learned about Marxism from some of his international friends in London. Scientifically, several papers based on his Ph.D. dissertation entitled "The Motion and Structure of Singularities in General Relativity" were published in prestigious international journals.

Despite the fellowship condition that the recipient had to go back to his country immediately after earning his Ph.D., Roger Posadas could have stayed in the US and continued his scientific career. After all, there were many recipients of graduate fellowships, including a number of former UP faculty members, who did not comply with this condition. But not Roger Posadas, who had the country's interests in mind. He wanted the Philippines to excel and be

known in the sciences.

He had a vision of the country freed from its colonial and neocolonial past and on its way to national development. He had to go back home, to help his countrymen realize this vision.

The first months of 1970 witnessed what was to be called the First Quarter Storm, when students marched and demonstrated in the streets, opposing the oil price hikes, calling for a true democratization of the University and society, and learning about the basic issues, the three ills that had long plagued the Philippines—imperialism, bureaucrat-capitalism and feudalism.

Although the students and the workers were being politicized, the University faculty, especially those in the sciences, were largely apolitical. The science departments then were mostly teaching departments. If research was being carried out, it was by a few faculty members with very little institutional support.

Faced with the problems related to the practice of his profession, the average science teacher did not think that his professional predicament was related to the fundamental problems of Philippine society. The link between the two was simply too complex to comprehend. Besides, he could hardly find time to do his research because of the heavy teaching load.

This was the situation in the country and in the science departments of the UP when Roger Posadas came back from the US. Because of his youth and his accomplishments, junior faculty members gravitated toward him. And with his knack for organizing (as a physics undergraduate, he set up and was the founding president of the UP Physics Society), he founded the first nationalist organization of scientists, the Samahan ng mga Makabayang Siyentipiko (SMS).

Posadas also helped set up the Samahan ng mga Guro sa Pamantasan (SAGUPA) a teachers' organization with a social conscience and a nationalist orientation. Soon after, the SMS, SAGUPA and other mass organizations like the Progresibong Samahan sa Inhenyari at Agham (PSIA)

Dr. Magpantay teaches in the College of Science, University of the Philippines, in Diliman, Quezon City.

were setting up chapters in Los Baños, UP Baguio, UP Tarlac and certain schools in Metro Manila.

The student movement's struggle for national democracy was gaining more support and members. The apolitical science and engineering faculty and students joined their ranks. The S&T (science and technology) sector began to realize that its concerns were not separate from the overall concerns of society. The national democratic movement had taken root in the S&T sector.

The SMS under Roger Posadas was known for three important activities. The first was the showing of an X-rated ("bomba") movie, *Sabrina*, which was a fund-raising success. It seemed the whole UP community, hungry for bomba movies but quite embarrassed to be seen in downtown moviehouses, attended the two showings in Abelardo Hall.

The SMS was also famous for the Molotov cocktail or improvised incendiary bomb used by the Diliman Commune defenders against the Metrocom. Even today, some newsmen still refer to Roger Posadas as the Molotov-bomb-making physicist during the Diliman Commune.

But the most important activity the SMS was involved in was the first ever serious study on the oil cartel and the oil price hikes.

The SMS provided the facts and arguments showing that the oil price hikes were unnecessary and exploitative. It also trained propaganda teams that explained the issue not only in the University but throughout Metro Manila, and sent oppositors to the Oil Industry Commission hearings. The SMS study on the oil price hikes of 1970 did a lot to improve the image of student activists. Now they were rebels with a cause who knew their facts and figures.

The suspension of the writ of habeas corpus in 1971 (after the Plaza Miranda bombing) and the subsequent inclusion of Posadas' name in a list of 60 activists wanted for subversion forced him to go underground. The declaration of martial law a year later prolonged his tenure, as it were in revolutionary movement.

In 1976, Posadas, his wife Linda and their group were captured. He was tagged by the military as the head of the Military Research Department of the Communist Party of the Philippines (CPP)-New People's Army (NPA) and was kept in detention for three years. Those three years in detention he devoted to political discussions and the restudy of physics. He looked forward to teaching in the Physics Department again.

Upon his release, Posadas went back to UP only to find the Department of Physics lacking in direction and low in morale. Faculty members were back to their old ways of teaching as a matter of routine and playing cards during off hours. The old department spirit during the SMS days was gone.

This time Posadas focused on the quest

for scientific excellence. Political issues were still discussed but the unifying goals for the department were academic excellence and the conversion of the department into a research institute.

After long discussions with key people in the sciences, Posadas came to the conclusion that the only way the science departments can break free from their stagnant state and move in the direction of an active research program was to set up a separate College of Science.

The College of Science was formally established in January 1984 with Roger Posadas as the first dean. He led, coaxed, and pressured the college to undertake major changes. Two departments, Physics and Geology, along with the Natural Science Research Center, were converted to National Center of Excellence. The Departments of Zoology and Botany were fused into the Institute of Biology, while the Department of Chemistry was transformed into the Institute of Chemistry.

Then the Marine Science Center was reorganized into the Marine Science Institute. Two interdisciplinary programs were later set up, the Molecular Biology and Biotechnology Program and the Materials Science and Engineering Program. Undergraduate and graduate programs also were revised, standardized and upgraded.

To ensure the continuity of the programs, rules on promotion, hiring and tenure were improved and institutionalized. Academic rules were spelled out. The rules and guidelines on the appointment of professorial chairs and faculty grants were defined to remove arbitrariness and to foster healthy competition.

Under Posadas, there was a marked improvement in the quality of the faculty—from 46 Ph.D.s., 89 M.S. degrees and 64 B.S. degrees in 1984 to 103 Ph.D.s., 57 M.S. degrees and 50 B.S. degrees as of January 1994. The college's research output increased—from 50 publications broken down into 37 local and 13 international in 1984, to 82 with 23 local and 59 international in 1989.

After accomplishing all this, even people who disagree in matters political or ideological with Roger Posadas will have to admit that he has done an excellent job in raising the College of Science to what it is today—a productive and functioning research organization.

But people who have been with him all these years since 1970 know that he has achieved much more. He taught generations of physics and science students the value of nationalism in the quest for S&T mastery and national development. In the final analysis, this is the only thing that counts in evaluating a science educator's achievement.

Today, as Chancellor of UP Diliman—his investiture was held last July 22—Dr. Roger Posadas continues with greater vigor and commitment to pursue his vision for the University as, to use his own words, "a fountainhead of nationalistic culture and spearhead of futuristic technology." G

Meeting with his executive staff (left) and behind the Chancellor's desk: The many roles of the nationalist as educator

Roger does not see things based solely on his personal biases. He looks at things very objectively and always secures the advice of people close to him on certain crucial and sensitive matters.

My Personal Impression of Chancellor Posadas

by Danilo Yanga
Dean, College of Science

I have known Chancellor Posadas since I was an undergraduate student. This was a long long time ago sometime in 1970-71. He was then my professor in classical mechanics and electromagnetic theory. Fresh from his graduate study abroad, Dr. Posadas gave me an impression of being a very conscientious, patient and diligent teacher. Ultimately, Dr. Posadas became my thesis adviser at a critical time which I remembered very well because Dr. Posadas was then incarcerated in Bicutan Rehabilitation Center due to his involvement in the anti-dictatorship movement. I had to communicate to him my mathematical calculations for corrections, comments, and observations. Despite this arrangement, I was able to finish my MS thesis while Dr. Posadas was in prison.

MANY PEOPLE CAN EASILY misunderstand Dr. Posadas. Apparently, to them he looks snobbish, unapproachable, and difficult to deal with. All this I believe is due to the fact that he seldom smiles and all the time looks so serious that people would simply want to evade him. I myself initially felt this way. Since I became a friend of Roger, almost twenty years ago, I have had a lot of misunderstandings with him, but in the end I was always able to reconcile with him. In the past, there have been many issues in the College of Science where our ideas were diametrically opposed. In fact, there was a time when some of these issues were so hard to resolve between the two of us that for about two years we did not like to see each other. The College has witnessed some of our ideological conflicts, but soon enough after the issues were settled, we became friends once again. None of our disagreements, however, were personal.

THE EXPERIENCE I HAD IN dealing with him on professional issues has enabled me to have a good appreciation of his attitude.

Roger does not see things based solely on his personal biases. He looks at things very objectively and always secures the advice of people close to him on certain crucial and sensitive matters.

CHANCELLOR POSADAS AS A

person is very well known to me, up to the point of knowing even some of his strengths and weaknesses. Roger likes singing very much and relaxing by taking a cup of coffee or drinking softdrinks and Cali. Whenever he hosts a social function, he likes entertaining people by offering them wine, liquor, and beer; and yet never drinks any of these. He likes wearing elegant clothes which fit him very well. He is a perfectionist who insists on getting his tailor to modify his clothes even for more than three times just to suit his wishes. He is rather meticulous.

AS A SCIENTIST, ROGER HAS

worked very hard in his research in general relativity. I know this very well because I was his thesis advisee. Later, he realized that doing basic research could not contribute much to the development of science and technology unless the current backward state of science were fully changed. Thus, he shifted to research on science policy and technology management and spearheaded many scientific activities and scientific movements and worked for the institution of many degree programs, among many other important things he has accomplished up to this date. The present infrastructure of the College of Science Complex is a silent testimony of one of his achievements. On the national level, he is a recognized expert on technology policy and a consultant to numerous government undertakings related to science and technology.

Roger Posadas

It is my great pleasure to have the opportunity to express my most sincere congratulations to Dr. Roger Posadas on his Investiture as the fourth Chancellor of University of the Philippines-Diliman and to the University of the Philippines-Diliman.

The position of Chancellor is one of great significance and respect. A Chancellor is responsible for the academic, political, and economic development of the university that the Chancellor oversees. This position of grave consequence is not given to one frivolously or arbitrarily.

It is my sincere hope that our two great institutions, under our benevolent direction, can move forward together academically, thus aiding the development of all institutions of higher learning in the region.

Once again, may I take this opportunity to extend my sincere good wishes and congratulations to Dr. Posadas and to the University of the Philippines-Diliman as a whole.

Greetings from the National Government

It is my honor to send my warmest greetings to Dr. Roger Posadas, the fifth Chancellor of the University of the Philippines in Diliman, on the occasion of his investiture.

The formal assumption of Dr. Posadas into office as Chancellor ushers in a period of dynamism and growth of the Diliman community. Backed by an impressive record of service to UP and a personal history that bespeaks a life-long commitment to science education in the country, Chancellor Posadas promises a new era in the Diliman community. His loyalty to UP is unquestionable, his academic credentials, superior and his administrative leadership, noteworthy. I am confident that with Chancellor Posadas at the helm, the Diliman community will be transformed into a more stimulating atmosphere of academic freedom, intellectual integrity and scientific learning.

Congratulations and best wishes to Chancellor Posadas.

Edgardo J. Angara
Senate President

In behalf of the DILG Family, our congratulations on your investiture as the fifth Chancellor of UP-Diliman.

Our best wishes, too, for a fruitful and successful administration under your tenure. We are

confident that UP-Diliman is in good hands under your stewardship.

Again, our sincere congratulations.

Rafael M. Alunan III
Secretary

Department of the Interior and Local Government
EDSA Corner Reliance St., Mandaluyong,
Metro Manila

On the auspicious occasion of the investiture of Dr. Roger Posadas as the fifth Chancellor of the University of the Philippines in Diliman, I offer my heartfelt greetings and felicitations.

The University of the Philippines in Diliman is acknowledged as one of the most prestigious seats of learning in the country responsible for the important task of training citizens in the economic, scientific, social, political and technical fields. The expertise of Dr. Posadas in science and technology and his proven administrative skills and leadership will enable the premier State University to maintain its high academic standards and sustain its important contributions to the progress of the nation.

Once again, my congratulations and best wishes to Dr. Posadas and to the entire community of the University of the Philippines in Diliman.

Antonio T. Carpio
Chief Presidential Legal Counsel
and Member, Board of Regents
University of the Philippines

Greetings from the University of the Philippines

Office of the Faculty Regent

It is my distinct pleasure to congratulate Dr. Roger Posadas on his investiture as the 5th Chancellor of UP Diliman.

As the turn of the century approaches, your formula of "Nationalistic Culture, Futuristic Technology" will help accelerate our national drive towards the status of a newly industrializing country (NIC). From the helm of the flagship university, UP Diliman, you will play a crucial part in addressing this national challenge through your excellent academic programs.

With your proven capacity for leadership, your vision to make UP Diliman the national center for academic excellence while developing it into a "fountainhead of cultural renaissance" and "futuristic advancement" will surely come to a realization.

More power to you and good luck!

Minda J. Formacion, Ph. D.
Faculty Regent

* * * * *

College of Fine Arts

The faculty, staff and students of the College of Fine Arts join me in extending warm congratulations to you on your well-deserved appointment as Chancellor of UP-Diliman.

We are confident that with you at the helm, the University of the Philippines in Diliman will continue to uphold academic excellence and academic freedom; two hallmarks that our Alma Mater has been traditionally known for to practice and revere.

With your enviable track record as Dean of the College of Science, we are confident that UP-Diliman can look forward to more halcyon days, characterized with a dynamic vision for a better Diliman and realized through myriad achievements in all fields of endeavors—from the arts to the sciences.

We, in the College of Fine Arts, would like to assure you of our support and cooperation in all your programs and plans to ensure the place of UP-Diliman as the flagship unit in the University System.

We hope that with the blessings of Almighty, your term of office will be a rewarding one. More power and once again, please accept our congratulations!

Nestor Olarte Vinluan
Dean, College of Fine Arts

College of Public Administration

I hail your investiture as the fifth Chancellor of UP Diliman, knowing your outstanding experience in leading UP Diliman as the flagship institution of the University of the Philippines. As UP President I participated twice in your selection as Dean of the College of Science. As Chancellor of UP Diliman myself in 1990-1991, I came to know you even better as a colleague and administrator. Earlier on I had known of your forward-looking views as a scientist reflecting on the development of national science and technology, and of your admirable opposition to authoritarianism.

As UP Diliman counts with half of the faculty and more than half of the students of the University as a whole, yours is the great challenges of inspiring and persuading each and all the Diliman faculty and academic units to be true leaders in their respective disciplines if UP is to better perform its leadership in higher education as the National Uni-

versity. As we all know, there is much room for improvement on this score. As Dean of the College of Science, your knowledge and credibility in developing the College into a leader in the pursuit of academic excellence should help you in raising the standards and performance of other units on our campus.

Your firmness in dealing with violators of the law and rules would also contribute to making the University a better example of respect for the rule of reason and law tempered by sensitivity to our humanity. We do need to assert and protect the autonomy and academic freedom of the University against ever present threats. You deserve the support of all of us on the faculty.

Jose V. Abueva
Professor of Political
Science and Public Administration
Leadership, Citizenship
and Democracy Program

Greetings from Philippine Universities

Basilan State College
Isabela, Basilan

The faculty and staff of Basilan State College extend their warmest greetings and felicitations on the occasion of your investiture as the fourth Chancellor of the most prestigious University.

May God be with you always.

Manila

The Mapua Institute of Technology and Community extend their sincere felicitations and congratulation to Dr. Roger Posadas in his investiture as Fourth Chancellor of the University of the Philippines-Diliman. We are certain that the affairs of the University will be in very competent hands under the stewardship of Dr. Roger Posadas.

Oscar B. Mapua, Sr.
President

* * * * *

Mindanao State University
Marawi City

My felicitations on your Investiture as fourth Chancellor of University of the Philippines-Diliman.

Stewardship of one of the most prestigious campuses in the country is a demanding and challenging job. It has been compared to a tightrope act, or deep-sea diving. It is indeed, for the most part, a balancing act. In a world grown more complex in a time of greater ferment, the burden of leadership can be crushing, this is especially true of your office. However, I am confident that you will find yourself

in your element and make the most of a difficult job. For it is the challenge that like a siren song, lures a man of character. In battling with the difficulties, he fulfills himself:

My sincerest wishes for a successful and rewarding term.

Emily M. Marohombsar
President

We wish you the very best as you enter a new and challenging ministry. May our Lord stand by you to give you light and courage in the difficult task before you.

Fr. Eliseo R. Mercado, Jr., OMI
President

Palawan National Agricultural College
Aborlan, Palawan

Heartfelt greetings from the Palawan National Agricultural College community!

The choice made to have you Chancellor is a very great fortune for the faculty and the students of the University of the Philippines-Diliman.

Your credentials bespeak well of your capability to be at the helm of the educational system of our Alma Mater.

We look up to you and the University.

Teresita L. Salva
President

Partido State College

Goa, Camarines Sur

In behalf of the Academic and Administrative Council of the Partido State College in Goa, Camarines Sur, I take pleasure to extend our warmest greetings and congratulations to Dr. Roger Posadas for making it as the fourth Chancellor of the prestigious university, the University of the Philippines-Diliman.

Your investiture on July 22, 1994 speaks your acceptance of a great challenge and of a big responsibility in maintaining the good image of the institu-

tion as well as your commitment to the realization of the university's goals and objectives so that it would continually contribute in the socio-economic development of the country.

To the new Chancellor and every participant thereof of this momentous occasion, our sincere best wishes for continued success.

Germes C. Dineros, Ph.D.
President

Philippine Military Academy
Fort Del Pilar, Baguio City

The men and women of the Philippine Military Academy join the felicitations of the entire academic community on the occasion of the Investiture of Dr. Roger Posadas as the fourth Chancellor of the University of the Philippines-Diliman.

Through the years, the University of the Philippines has stood tall in its role as the primary educational institution of the country, having had produced the best graduates in the field of academics as well as other fields of endeavors. Graduates.... who have become the pillars of our educational thrust today.

Commendable records such as these may not be possible without the able stewardship and guidance of the University's seniors and leaders. Undoubtedly, the investiture of Dr. Roger Posadas would add another force to reckon with and reasons to be proud of.

Again, congratulations and my wish of success to your new position.

Rodolfo S. Estrellado

President

* * * * *

Osaka University of Foreign Studies
Osaka, Japan

The Osaka University of Foreign Studies joins the academic world in warmly greeting Dr. Roger Posadas on the occasion of his investiture as the fourth Chancellor of the University of the Philippines-Diliman.

The University of the Philippines-Diliman, as the flagship campus, has been very supportive of our Philippine Studies Program since its inception 10 years ago. Through the Visiting Professors from UP Diliman, the teaching of Filipino and Philippine culture in our University has been enriched in terms of teaching method and teaching materials. The very presence of UP professors in our campus has added prestige to the Philippine Studies Program. Likewise, contacts on the student level have strengthened bonds of friendship between our two countries.

We are confident that under your stewardship, UP Diliman will continue to forge closer links with our University.

Osamu Ikeda
President

Papua New Guinea
University of Technology
Morobe Province, Papua New Guinea

I would like to congratulate the University of the Philippines-Diliman for the wise investiture of my dear colleague and friend Dr. Roger Posadas as its fifth Chancellor.

Dr. Posadas is a well-known theoretical physicist in the Philippines. We have known each other very well for more than fifteen years. We worked together mostly during our services as presidents of the Thai and Philippine Institute of Physics. At that time we were working very closely on the problems of how to bring the ASEAN Physical Societies into closer contact (so they could work together more) and how to develop physics and physical activities in the region.

Please convey our "Hearty Congratulations" to Dr. Roger Posadas on his recent assumption of the Chancellorship.

Mr. Misty E Baloiloi
Vice Chancellor

* * * * *

Peking University
Beijing, China

Hereby, please allow me, on behalf of Peking University to express our warmest congratulations to you for this significant occasion. Meanwhile, I would like to extend my best wishes to you and hope the friendly ties between our two Universities will be further enhanced during your tenure of office.

Once again, my heartfelt congratulations on your promotion.

Luo Hao Cai
Vice President

Prince of Songkla University
Thailand

On behalf of President Siripongse and everyone at Prince of Songkla University, I wish Dr. Posadas the very best and am confident that under his leadership the University of the Philippines-Diliman will continue to provide the academic excellence that has earned it the respect and admiration of academic institutions throughout the world.

Asst. Prof. Piroj Intarasirisawat
Vice-President for
Planning and Development
Siripongse Srihibhadh
President

Renmin University of China
Foreign Affairs Division
Beijing, China

I sincerely extend my cordial greetings to you for being the fifth Chancellor of the University of the Philippines-Diliman. I also hope that the University of the Philippines-Diliman grows with vigor by your leading. During your term of office, I believe you will further the friendship between the Chinese people and the Filipinos.

As the president of Renmin University of China, I finished my term of office. I am very pleased to introduce professor Li Wenhai who is the new president of our University. Prof. Li is a historian. Under President Li Wenhai's term of office, I believe and hope the development of academic exchange and cooperation between the University of the Philippines-Diliman and Renmin University of China will take a new step.

Huang Da
Ex-President

Rensselaer Polytechnic Institute
Troy, New York

Thank you for the invitation to attend the investiture of Dr. Roger Posadas as the fourth Chan-

cellor of the University of the Philippines-Diliman.
With best wishes to Dr. Posadas for distinguished service in the cause of higher education.

Shirley M. Molloy
Secretary of the Institute

Ritsumeikan University
International Center
Japan

I want to first and foremost congratulate you on becoming the fifth chancellor at the Diliman campus. I know the challenges ahead will be met with professionalism and resolve.

If you recall in March of this year, I and Mr. Hashimoto were to have visited your campus but were unable to do so. I am now pleased to tell you that a small delegation from Ritsumeikan University is planning a visit to the University of the Philippines at Diliman.

I would be most grateful if you would receive the representatives from Ritsumeikan University at the Diliman Campus of UP, with the purpose of discussing the possibility of exchanges in the field of research.

Fusao Ishii
Director

Ritsumeikan University
Kyoto, Japan

I would like to offer my most sincere congratulations on your inauguration as fifth chancellor of the University of the Philippines in Diliman.

Last year, in striving to further the contribution of universities to world peace, Ritsumeikan University conducted the 'Asia Pan Pacific Presidents Forum'. On that occasion, as a representative to the University of the Philippines, you indicated the importance of the role of the university in contributing to the attainment of peace in Asia through education and research. I would like to take this opportunity to reiterate our deepest appreciation to you for helping enable the success of this forum.

As we move from a "twentieth century plagued by war" to a "twenty-first century focusing on world peace", the mission of the university in both contributing to world peace and human welfare through seeking truth, as well as in providing education for our youth who will bear the responsibilities of tomorrow, is growing ever more important.

As members sharing the same Asia, I look forward to cooperating together to help deepen our mutual understanding.

I wish you all the very best of success in your new position, and for the prosperity of your university.

Maseteru Ohnami
President

* * * * *

San Diego State University
San Diego, California

Thank you for the invitation to be present at the investiture of Roger Posadas as Chancellor of the University of the Philippines-Diliman.

May I take this opportunity to extend my best wishes on this very important occasion.

Thomas B. Day
President

* * * * *

San Francisco State University
San Francisco, California

On behalf of San Francisco State University, I would like to offer my congratulations on the occasion of your Investiture as Chancellor of the University of the Philippines-Diliman. The role of universities has never been more important. Our students and the communities into which they graduate look to higher education for both intellectual and moral leadership.

Under your guidance, the University of the Philippines will, I am confident, provide that leadership and will fulfill its potential as a major constructive force in the life of your nation.

I wish you very best wishes as you take up this challenging and immensely significant post.

Robert A. Corrigan
President

* * * * *

San Jose State University
San Jose, California

On behalf of the San Jose State University faculty, staff, and students, I send congratulations and felicitations to Chancellor Roger Posadas on his investiture.

J. Handel Evans
President

South Dakota State University
Brookings, South Dakota

I send best wishes to Dr. Roger Posadas and to the University on this important occasion. The festivities of the day will set the pace for a creative and productive administration. May the celebration continue as the University of the Philippines-Diliman moves forward to new academic achievements.

Robert T. Wagner
President

Stanford University
The Office of the President
California

On behalf of Stanford University, I should like to extend our congratulations to you on the Investiture of Dr. Roger Posadas as fourth Chancellor of the University of the Philippines-Diliman.

May the university flourish with his guidance and continue with success in its pursuit of scholarly excellence.

It is a pleasure to join you in celebration of this important occasion.

Gerhard Casper

Sukhothai Thammathirat Open University
Thailand

I am pleased to extend my sincerest congratulations to Dr. Roger Posadas on his appointment as Chancellor. On behalf of all of us here at Sukhothai Thammathirat Open University, I wish him well in his new responsibilities and hope that his tenure will meet with much success following the fine tradition of higher education in the Philippines.

Once again, my congratulations on this notable occasion and best wishes to you and your colleagues.

Dr. Iam Chaya-Ngam
Professor and President

Syracuse University
Syracuse, New York

The faculty, staff, and students of Syracuse University join me in wishing you well as you are invested as Chancellor of the University of the Philippines-Diliman.

Those of us who lead higher education institutions in this decade face multiple challenges in an age when the world grows smaller through high speed communication technologies and far greater global

marketplace competition. The men and women we educate today will contribute to the well being of all the world's people as they apply their knowledge and experiences. It is critical that we see to it that our respective institutions do their jobs well.

I wish you all good fortune as you take on your new duties. I hope for an opportunity to meet one day.

Kenneth A. Shaw

Tamkang University
Taipei, Taiwan

I am happy to be informed that the investiture of Dr. Roger Posadas, fourth Chancellor of the University of the Philippines-Diliman on July 22 1994.

In my capacity as President of Tamkang University, I extend my warmest congratulations to Dr. Roger Posadas.

Yun-Shan Lin, Ph.D.
President

Thammasat University
Bangkok, Thailand

I am very delighted to hear that you have been appointed the chancellor of the University of the Philippines-Diliman. On behalf of Thammasat University, I would like to extend my best wishes to you and your new administration for a successful tenure and a bright future.

I hope that in the near future the University of the Philippines and Thammasat University should start an academic cooperation which will benefit both universities.

Dr. Charnvit Kasetsiri
Rector

Tokyo Denki University
Japan

It is a pleasure to know that you were elected as Chancellor of University of the Philippines.

I would like to express my congratulations and best wishes to your new, exciting assignment and I hope that our continued cooperation will ever be strengthened.

Sogo Okamura
President

* * * * *

Tokyo University of Foreign Studies
Togaidai, Tokyo

It is a great honor to me to be invited to the investiture of Dr. Roger Posadas, fourth Chancellor of the University of the Philippines-Diliman. I hereby convey my best wishes to Dr. Posadas, who I believe will open a new horizon for the University.

As you might have known, ours is one of the few institutions in Japan where the Philippine language is taught and studied as an undergraduate major. We also have accepted a lot of students from your country. On behalf of my university I sincerely hope that this correspondence will make a good opportunity to strengthen the ties of friendship between us.

Hajime Ozaki
Professor

Greetings from International Agencies

Asian Vegetable Research and
Development Center
Tainan, Taiwan

In behalf of the Asian Vegetable Research and Development Center (AVRDC), my heartfelt congratulations on the occasion of your investiture as the fourth Chancellor of the University of the Philippines-Diliman.

Let me take this opportunity to assure you of our absolute support in your commitment to relevance and excellence in the academe. With you at the lead of one to the premier universities in the region, we envision a more intensified collaboration in the areas of research, training, extension, and education. With our common vision to improve the social well-being of the Asian People, and through mutual cooperation and respect, together let us respond to the demands of a changing environment and be sensitive to the needs of a maturing research and development system.

As the "university of the people", I am confident that UP will take center stage in championing the cause of improving the plight of the Filipinos. Through extension and education, UP will be one of the keys to the realization of the Philippines' thrust of sustainable growth and industrialization.

Again, my warmest greetings on your investiture. Let your undaunted commitment to academic excellence complement your country's development goals.

Samson C.S. Tsou
Director General

Council of Agriculture, Executive Yuan
Taipei, Taiwan

I was delighted to hear about the appointment of Dr. Roger Posadas as the fourth Chancellor of the University of the Philippines-Diliman, and I would like to take this opportunity to extend my warm congratulations on his new assignment.

My heartiest congratulations again to Dr. Roger Posadas, and I wish you every success in your career.

Paul M. H. Sun, Ph.D.
Chairman

* * * * *

International Peace Research Institute Meigaku
Yokohama, Japan

It is a great pleasure for me to hear that you have been elected the fifth Chancellor of the University of the Philippines in Diliman.

Recalling our pleasant and fruitful discussions on the Philippines-Japan science collaboration at Waseda University and Sophia University, particularly your impressive talk on the Philippines' role in peace of Asia and the Pacific at the Pugwash Symposium held in Tokyo in September 1989, I am immensely pleased to be able to have a bright prospect to a genuine science for people in Asia.

I have been heartily respecting the constitution of your country which renounces nuclear weapons of any country. As you know well, in order to overcome the nuclear age, the restructuring of the present-day science and technology is urgently needed. I believe you will be able to challenge this grand task with your colleagues.

I wish you good health and brilliant success.

Toshiyuki Toyoda
Former Director

Japan International Cooperation Agency
Philippine Office

It is a great privilege and pleasure to express my sincere congratulations on the occasion of the Investiture of Dr. Roger Posadas as the Fifth Chancellor of the University of the Philippines-Diliman. You have my best wishes as you assume your new, important responsibilities.

Akihiko Hashimoto
Resident Representative

* * * * *

National Research Council
Bangkok, Thailand

Please add my warmest congratulations to the large chorus of friends acclaiming your honor as the fifth chancellor of the University of the Philippines. I heard about the honor you received with delight but not surprise. It is a well-deserved recognition of your excellent work and I am sure you must be very happy and proud at this great honor.

My very best wishes for your continued successes.

Prof. Dr. Sanga Sabhasri
Chairman, NRCT Executive Board

World Health Organization
Regional Office for The Western Pacific

I was glad to attend your investiture as the fifth Chancellor of the University of the Philippines-Diliman yesterday as the representative of the Johns Hopkins University. I was particularly impressed that the rites were all in our national language, including the program, addresses and invitation.

I particularly admire your address immediately following your investiture. If there is a translation in English, I would appreciate having a copy as I am sure that President Richardson of Johns Hopkins will be interested in reading it.

Congratulations and all good wishes on your extremely important task ahead.

Francisco J. Dy, MD , M.P.H.
Regional Director Emeritus
